

How to pair your RTX Repeater with your Gigaset Phone in 5 easy steps.

- 1** **Disable ECO MODE (ECO DECT).**
On your handset go into Main Menu > Settings > ECO MODE /DECT and ensure "Maximum Range" is ticked and "No Radiation" is deactivated.
- 2** **Disable Encryption**
On your handset go into the Main Menu > Settings > System and ensure that "Encryption" is deactivated.
- 3** **Put base in pairing mode**
On the base unit of your phone (the main unit connected to your telephone line) find the paging key (Handset Locator) and hold down for 5 seconds
- 4** **Put repeater in pairing mode**
Plug in the repeater and hold down the button on the back for 5 seconds. *The LED light on the front of the repeater should now flash quickly.*
- 5** **Complete registration**
On the handset press the number "2" key followed by the green call button as if you are dialling the number "2". Wait 2 seconds and then press * followed by the red end call button. *The LED on the repeater should now be a solid green light and registration is complete.*
