

## How to pair your Panasonic KX-A405 with your phone in 5 easy steps.

- 1 Prepare repeater for registration**

Whilst pressing the [PROGRAM] button connect the repeater to the mains. Keep holding for about 10 seconds until the light on the front stops flashing and lights red. Release [PROGRAM] and unplug the repeater.
- 2 Prepare handset for registration**

On the handset of your Panasonic Cordless Phone go into Main Menu > Initial Setup > Repeater and ensure that it is enabled.
- 3 Put phone base in pairing mode**

On the base unit of your phone (the main unit connected to your telephone line) find the paging key (Handset Locator) and hold down for 5 seconds.
- 4 Put repeater in pairing mode**

Connect the repeater to the mains and wait until the light on the repeater turns to a solid green.
- 5 Complete registration**

Press the locator button on the main base briefly to complete registration. You can now disconnect the repeater from the mains and reconnect as far away from the base of your phone to extend the range of your cordless phones.
