

## How to pair your RTX Repeater with your Panasonic Phone in 5 easy steps.

- 1 Before you start**

Make sure that you are next to the base station of your phone (the main unit connected to your telephone line) and that the phone line is not in use.
- 2 Prepare handset for registration**

On the handset of your Panasonic Cordless Phone go into Main Menu > Initial Setup > Repeater and ensure that it is enabled.
- 3 Prepare repeater for registration**

Power on the repeater and press and hold the button on the back of it for 15-20 seconds. The LED on the repeater should now be flashing twice.
- 4 Put phone base in pairing mode**

On the base unit of your phone (the main unit connected to your telephone line) find the paging key (Handset Locator) and hold down for 5 seconds.
- 5 Complete registration**

Press the locator button on the main base briefly to complete registration. You can now disconnect the repeater from the mains and reconnect as far away from the base of your phone to extend the range of your cordless phones.
